

PROFESSIONAL SUMMARY

Recent B.Tech (Hons.) Computer Science Engineering graduate with a specialization in Machine Learning and a strong interest in Software Development and Artificial Intelligence. Proficient in Python, SQL, Data Structures & Algorithms. Built projects involving AI, RAG systems, computer vision, deep learning, and database-driven applications, complemented by research publication experience. Passionate about solving real-world problems through scalable software solutions and eager to contribute, learn, and grow in a challenging engineering environment.

KEY EXPERTISE

Machine Learning & Deep Learning, Data Structures & Algorithms, Generative AI, Natural Language Processing (NLP)

EDUCATION

RV University

2023 - 2027

B.Tech. - CSE - Artificial Intelligence and Machine Learning | CGPA: 9 / 10

Base PU College, Mysore

2023

12th | PUE Karnataka | Percentage: 94.83 / 100

Manasarowar Pushkarini Vidyasharama, Mysuru

2021

10th | CBSE | Percentage: 79.66 / 100

INTERNSHIPS

Enkefalos Technologies Pvt Ltd | IT Product & Services

01 Jun, 2026 - 31 Jul, 2026

AI INTERN

Key Skills: Python, Retrieval-Augmented Generation, Ollama, Langchain

Developed a FastAPI agentic RAG chatbot using LangChain. Transitioned from local LLMs to Gemini for improved performance. Implemented hybrid search combining BM25 and Chroma DB (Ollama embeddings) with MD5-based document fingerprinting. Integrated Tavily API for web search and SQLite-backed persistent conversation history management.

PROJECTS

AI-Powered Intelligent Drive Agent

Key Skills: Node.js, LangChain, Ollama, SQLite, Google OAuth

Developed an autonomous agent using Python and Local LLMs to intelligently analyze and manage Google Drive repositories.

- Implemented a robust RAG (Retrieval-Augmented Generation) pipeline using LangChain and SQLite-based vector storage for semantic file search and contextual Q&A.
- Engineered a hybrid search system combining vector embeddings with keyword matching to optimize retrieval accuracy.

PUBLICATIONS / RESEARCH / WHITE PAPERS

Unpaired Adverse-Weather Image Translation Using GAN Architectures with XAI-Driven Interpretability Across Multi-Domain Conditions

14 Mar, 2026

IEEE i3ctcon 2026 | **Mentor:** Prof Ashwini, Prof Merin Thomas | **No. of Authors:** 6

Key Skills: Deep Learning, Generative Adversarial Networks, Explainable AI, Image-to-Image Translation

Developed a deep learning framework for translating images between multiple adverse weather conditions using unpaired Generative Adversarial Networks (GANs). Implemented CycleGAN, FastCUT, and a Resnet-based generator with VGG Perpetual loss architectures to generate realistic weather transformations without paired training data. Integrated Explainable AI (XAI) techniques to interpret model predictions and evaluated performance using quantitative metrics such as FID, PSNR, and SSIM.

PERSONAL DETAILS

Gender: Male

Marital Status: Single

Current Address: 62, 2nd Main, Sait Lotus Layout,
Rajarajeshwari Nagar, Bengaluru, Karnataka, India

Emails: skandarb.btech23@rvu.edu.in , skandarb2005@gmail.com

Date of Birth: 03 Mar, 2005

Known Languages: Kannada, English

Permanent Address: 5, 3rd Main, 5th Cross, Sarawasathipuram,
Mysuru, Karnataka, India - 570009

Phone Numbers: +91-9148246127, +91-9148246127
